TESTS TO FAILURE ON CONNECTIONS BETWEEN
PRECAST AND IN SITU CONCRETE MEMBERS.

[1962] [13]p. 1 ref.

Order from SLA \$1.60

62-18783

Trans. of Beton und Stahlbetonbau (Germany) 1961,
v. 56, no. 2, p. 32-37.

DESCRIPTORS: Test methods, *Concrete, Casting,
Supports, Stresses, *Failure (Mechanics), *Bonded
joints, *Construction.

Some tests are described which were made for the
purpose of obtaining information on the ultimate
strength of structural joints between precast and in
situ concrete members. The test specimens were made
on the construction site with the normal amount of care
exercised under such conditions. In all cases the safety
against cracking and against failure was quite as good
as could have been expected from entirely in situ forms
of construction. (Author)
